

#1 in COLORED Vinyl Windows

**SUPER CAP SR**  
COLOR - DURABILITY - INTEGRITY

- Proprietary exterior window coloring technology
- Thermally fused color layer for superior durability
- Low heat absorbing technology reflects 76% of infrared light
- **SUPER CAP SR** color surface is 450% harder than paint
- Weathering and Color Change meets AAMA 613 color standards

**SUPER CAP SR** is the next step in colored windows.

Offering improved durability over painted windows. Heat build up of **SUPER CAP SR** falls within the acceptable range of proven colored profiles – only 6 degrees more horizontal predicted heat build up over standard white vinyl.

The specially engineered cap and substrate system reflects approximately 76% of the IR radiation, compared to 32% or less for competing technologies.

4 years of testing in the harsh Arizona and Florida environments prove **SUPER CAP SR** exceeds AAMA 613 color fade resistance and 303 for impact and shrink performance.

No job site touch up, **SUPER CAP SR** will not crack, peel or flake.

American Integrity is the leader in colored vinyl windows. A pioneer in Solar Reflective Coating technology with a decade of experience. American Integrity has given architects and builders a palette of colors to work with.

Enrich the look of your project with **SUPER CAP SR** windows from American Integrity.

Setting the standard in colored vinyl windows
